Improving substance use disorder treatment and recovery outcomes in adults in reentry programming.

9. Attach a one page summary of grant

10. Attach a one page budget of grant.

Lancaster County, Nebraska is submitting this grant application to support expansion of systems approaches that will improve outcomes for adults with substance use disorders who are reentering the community from the local jail facility. Lancaster County is requesting priority consideration supporting Executive Order 13985: Advancing Racial Equity and Support for underserved Communities in area 1B through a partnership with the Community Justice Center. Lancaster County is also requesting priority consideration under area 2, implement or expand access to medically assisted treatment. This project will incorporate a specific curriculum for African American men ages 18 to 29 and African American women with mental and/or substance use disorders, will engage the local community college in consultation and education and local system coordination to better serve minority populations. Consultation with the Nebraska Medical Association will ensure medication assisted treatment, including opioid use disorder treatment, is available to all participants who qualify. This grant project will strengthen and expand treatment programs and the continuum of recovery services to improve long term outcomes for participants. Data collection and analysis will provide an on-going program evaluation.
