**MOTION:** Schorr moved and Yoakum seconded approval of the consent items. Yoakum, Vest, Schorr and Amundson voted yes. Flowerday was absent. Motion carried 4-0.

**5) NEW BUSINESS:**

- A.** Lancaster County Visitors Improvement Fund Grant Contract in the amount of \$100,000 with Lancaster County as the Sponsor and the Malcolm Youth Sports Association as the Grantee, for the construction of perimeter fencing on softball and baseball fields. The grant term is October 1, 2019 through November 30, 2019. (C-19-0803)

Jen Holloway, Deputy County Attorney, said some insurance documents are missing, therefore, she recommended the Board approve the contract contingent on receipt of insurance.

**MOTION:** Schorr moved and Yoakum seconded approval of the grant contract contingent on receipt of insurance. Yoakum, Vest, Schorr and Amundson voted yes. Flowerday was absent. Motion carried 4-0.

- B.** Interlocal Agreement with the State of Nebraska to provide building space to make available residential programs and treatment services, in a secure and safe environment, through the Youth Rehabilitation and Treatment Centers for youth committed to or placed with Department of Health and Human Services, Office of Juvenile Services. (C-19-0800)

Michelle Schindler, Lancaster County Youth Services Center Director, appeared with Bo Botelho, Department of Health and Human Services (DHHS) General Counsel. Schindler said the contract would allow DHHS to lease units in the youth services facility. Botelho said this would be a third location that will continue to serve youth with high acute needs.

Schorr asked about timeframes. Botelho said the lease becomes effective upon execution. DHHS will then need to make modifications to the facility. He hoped it would be open soon after January 1, 2020.

Amundson asked if building modifications would be reviewed by the County. Kerin Peterson, County Property Manager, said she would receive specifications prior to any work being done.

Vest asked if any terms have changed from the last draft he reviewed. Peterson said DHHS requested additional parking spaces which will be accommodated, and those fees have been added to the lease.

**MOTION:** Schorr moved and Yoakum seconded approval of the interlocal agreement. Schorr, Yoakum, Vest and Amundson voted yes. Flowerday was absent. Motion carried 4-0.

- C.** Recommendation from the Purchasing Agent and Lancaster County Sheriff to award and execute a Purchase Order to Bizco Technologies for toughbook notebooks (Bid No. 19-256). The total amount of the order is \$26,012.08. (C-19-0798)

Terry Wagner, Lancaster County Sheriff, said this recommendation is for the mobile data computers that are in Sheriff patrol cars. He added usually six are replaced per year.

**MOTION:** Schorr moved and Yoakum seconded approval of the recommendation. Vest, Schorr, Yoakum and Amundson voted yes. Flowerday was absent. Motion carried 4-0.

- D. Contract with Ramoncito Ocampo to provide psychiatrist services at the Mental Health Crisis Center for the period of October 1, 2019 through September 30, 2020. The cost to the County is \$770 per 24-hour coverage period. (C-19-0802)

**MOTION:** Vest moved and Yoakum seconded approval of the contract. Yoakum, Vest, Schorr and Amundson voted yes. Flowerday was absent. Motion carried 4-0.

## Introduction and Overview

---

This report summarizes the findings from the 2018 Nebraska Risk and Protective Factor Student Survey (NRPFSS). The 2018 survey represents the eighth implementation of the NRPFSS and the fifth implementation of the survey under the Nebraska Student Health and Risk Prevention (SHARP) Surveillance System. SHARP consists of the coordinated administration of three school-based student health surveys in Nebraska, including the NRPFSS, the Youth Risk Behavior Survey (YRBS), and the Youth Tobacco Survey (YTS). The Nebraska SHARP Surveillance System is administered by the Nebraska Department of Health and Human Services and the Nebraska Department of Education through a contract with the Bureau of Sociological Research at the University of Nebraska-Lincoln. For more information on the Nebraska SHARP Surveillance System please visit <http://bosr.unl.edu/sharp>.

As a result of the creation of SHARP and its inclusion of the NRPFSS, the administration schedule shifted from the fall of odd calendar years to the fall of even calendar years. The first three administrations of the NRPFSS occurred during the fall of 2003, 2005, and 2007, while the fourth administration occurred during the fall of 2010, leaving a three-year gap (rather than the usual two-year gap) between the most recent administrations. The 2012, 2014, 2016, and 2018 administrations also occurred during the fall, as will future administrations, taking place during even calendar years (i.e., every two years).

The NRPFSS targets Nebraska students in grades 8, 10, and 12 with a goal of providing schools and communities with local-level data. As a result, the NRPFSS is implemented as a census survey, meaning that every public and non-public school with an eligible grade can choose to participate. Therefore, data presented in this report are not to be considered a representative statewide sample. The survey is designed to assess adolescent substance use, delinquent behavior, and many of the risk and protective measures that predict adolescent problem behaviors. The NRPFSS is adapted from national, scientifically-validated surveys and contains information on risk and protective measures that are locally actionable. These risk and protective measures are also highly correlated with substance abuse as well as delinquency, teen pregnancy, school dropout, and violence. Along with other locally attainable sources of information, the information from the NRPFSS can aid schools and community groups in planning and implementing local prevention initiatives to improve the health and academic performance of their youth.

Table 1.1 provides information on the student participation rate for Lancaster County. The participation rate represents the percentage of all eligible students who took the survey. If 60 percent or more of the students participated, the report is generally a good indicator of the levels of substance use, risk, protection, and delinquent behavior in Lancaster County. If fewer than 60.0 percent participated, a review of who participated should be completed prior to generalizing the results to your entire student population.

### 2018 NRPFSS Sponsored by:

The 2018 NRPFSS is sponsored by Grant #5U79SP020162-05 and #1H79SP080988-01 under the Strategic Prevention Framework Partnerships for Success Grant for the Substance Abuse and Mental Health Services Administration Center for Substance Abuse Prevention through the Nebraska Department of Health and Human Services Division of Behavioral Health.

The Bureau of Sociological Research (BOSR) at the University of Nebraska – Lincoln (UNL) collected the NRPFSS data for this administration as well as the 2010, 2012, 2014, and 2016 administrations. As part of BOSR's commitment to high quality data, BOSR is a member of the American Association for Public Opinion Research (AAPOR) Transparency Initiative. As part of this initiative, BOSR pledges to provide certain methodological information whenever data are collected. This information as it relates to the NRPFSS is available on BOSR's website ([www.bosr.unl.edu/sharp](http://www.bosr.unl.edu/sharp)).

*Note. The grade-specific participation rates presented within this table consist of the number of students who completed the NRPFSS divided by the total number of students enrolled within the participating schools. For schools that were also selected to participate in the YRBS or YTS, the participation rate may be adjusted if students were only allowed to participate in one survey. In these cases, the number of students who completed the NRPFSS is divided by the total number of students enrolled that were not eligible to participate in the YRBS or YTS.*

Again, the goal of the NRPFSS is to collect school district and community-level data and not to collect representative state data. However, state data provide insight into the levels of substance use, risk, protection, and delinquent behavior among all students in Nebraska. In 2018, 30.9 percent of the eligible Nebraska students in grades 8, 10, and 12 participated in the NRPFSS.

The 2018 participation rate for the state as a whole remains lower than the 60.0 percent level recommended for representing students statewide, so the state-level results should be interpreted with some caution. Failure to obtain a high participation rate statewide is, in part, due to low levels of participation within Douglas and Sarpy Counties, which combined had an 11.2% participation rate in 2018 compared to 44.4% for the remainder of the state.

Table 1.2 provides an overview of the characteristics of the students who completed the 2018 survey within Lancaster County and the state overall.

### Overview of Report Contents

The report is divided into the following five sections: (1) substance use; (2) transportation safety; (3) violence, bullying, and mental health; (4) nutrition and physical activity; and (5) feelings and experiences at home, school, and in the community. Within each section, highlights of the 2018 survey data for Lancaster County are presented along with state and national estimates, when available.

When there are less than 10 survey respondents for a particular grade, their responses are not presented in order to protect the confidentiality of individual student participants. However, those respondents are included in regional- and state-level results. Furthermore, if a grade level has 10 or more respondents but an individual question or sub-group presented in this report has less than 10 respondents then results for the individual item or sub-group are not reported.

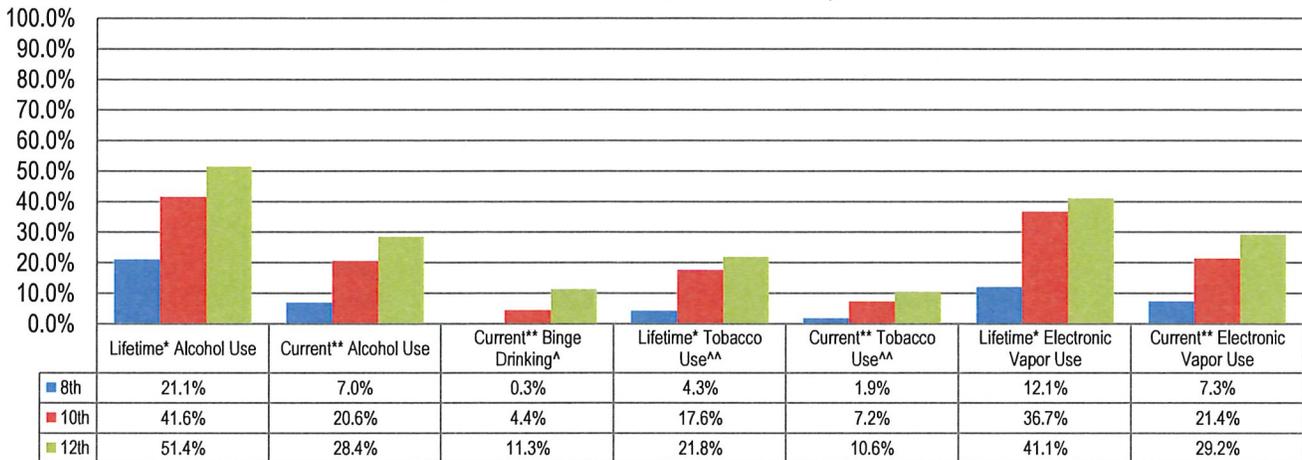

A number of honesty measures were also created to remove students who may not have given the most honest answers. These measures included reporting use of a fictitious drug, using a substance during the past 30 days more than in one's lifetime, answering that the student was not at all honest when filling out the survey, and providing an age and grade combination that are highly unlikely. Students whose answers were in question for any one of these reasons were excluded from reporting. For Lancaster County, 44 students met these criteria.

**Substance Use**

This section contains information on the use of alcohol, tobacco, and other drugs among 8<sup>th</sup>, 10<sup>th</sup>, and 12<sup>th</sup> grade students in Nebraska. In addition, there is information on attitudes and perceptions, the sources of substances, and other substance-related topics. To provide greater context for the results from Lancaster County, overall state and national results are presented when available. As discussed earlier, the state results are not to be considered a representative statewide sample. The national data source is the Monitoring the Future survey, administered by the Institute for Social Research at the University of Michigan and sponsored by the National Institute on Drug Abuse and National Institutes of Health.

**Tips for Using the NRPFSS Results**

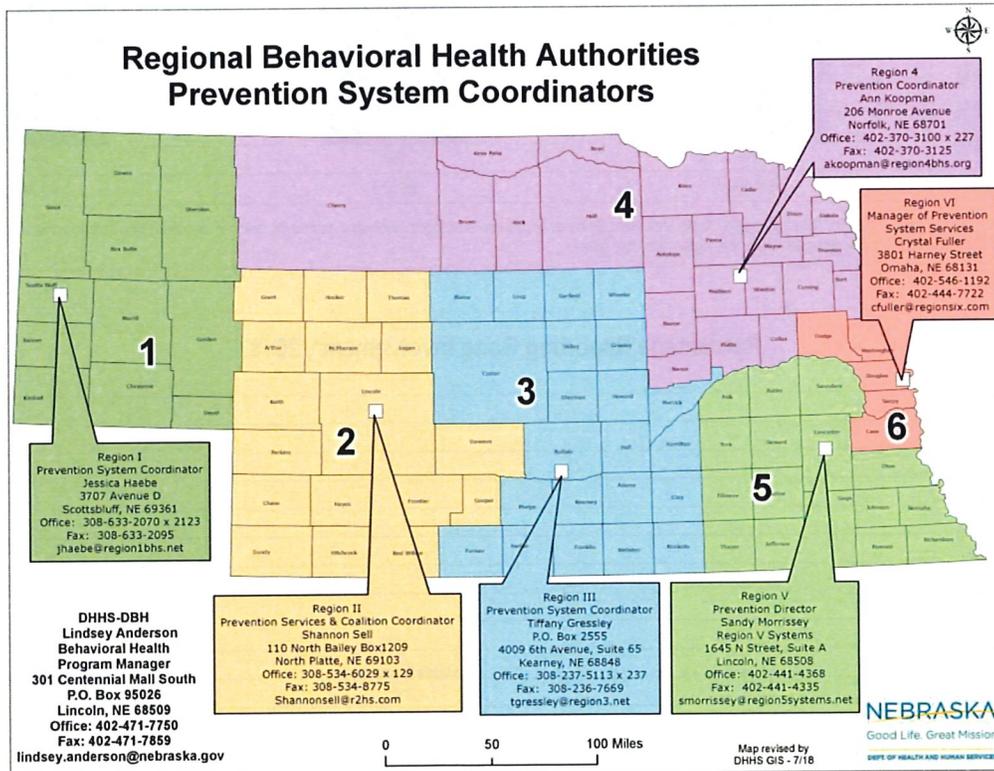

As a valued stakeholder in your community, you play an important role in prevention by teaching skills, imparting knowledge, and in helping to establish a strong foundation of character and values based on wellness, including prevention of substance use, suicide, and other risky behaviors. Preventing mental and/or substance use disorders and related problems in children, adolescents, and young adults is critical to promoting physical health and overall wellness.

There are a variety of strategies (or interventions) that can be used to increase protective factors and reduce the impact of risk factors. Prevention in schools is often completed through educational programs and school policies and procedures that contribute to the achievement of broader health goals and prevent problem behavior.

Prevention strategies typically fall into two categories:

- **Environmental Strategies**
  - These strategies effect the entire school environment and the youth within it.
    - An example of an environmental strategy would be changing school policy to not allow athletes to play if they are caught using substances.
- **Individual Strategies**
  - These strategies target individual youth to help them build knowledge, wellness, and resiliency.
    - An example of an individual strategy would be providing a curriculum as part of a health class about the harms of substances.

If you would like to implement strategies in your school or community, please contact your regional representative as shown on the map below.

You may also wish to do your own research. The following websites provide listings of evidence-based practices:

- **The Evidence-Based Practices Resource Center**
  - This is a searchable online evidence-based repository and review system designed to provide the public with reliable information on mental health and substance use interventions that are available for implementation.
  - **Website:** <https://www.samhsa.gov/ebp-resource-center>
  
- **The Office of Juvenile Justice and Delinquency Prevention's (OJJDP's) Model Programs Guide (MPG)**
  - This contains information about evidence-based juvenile justice and youth prevention, intervention, and reentry programs. It is a resource for practitioners and communities about what works, what is promising, and what does not work in juvenile justice, delinquency prevention, and child protection and safety.

In accordance with LB923, public school staff in Nebraska are required to complete at least 1 hour of suicide awareness and prevention training each year. To learn more, visit the Nebraska Department of Education website at <https://www.education.ne.gov/Safety/index.html>. Resources on Bullying Prevention and Suicide Prevention are listed.

A variety of print materials on behavioral health topics including depression, trauma, anxiety, and suicide are available from the Substance Abuse and Mental Health Services Administration (SAMHSA). Materials include toolkits for school personnel, educational fact sheets for parents and caregivers, wallet cards and magnets with the National Suicide Prevention Lifeline. The direct link to the SAMHSA store is <https://store.samhsa.gov/>.

Another resource for kids, teens, and young adults is the **Boys Town National Hotline**, specifically the **Your Life Your Voice campaign**. Wallet cards and other promotional materials are available at no cost for distribution to students, school staff, parents, etc. <http://www.yourlifeyourvoice.org/Pages/home.aspx>. Remember, talking about suicide with a student does not put an idea of attempting suicide in a student's mind.

<sup>1</sup>Prior to 2016, the question asked students about their "parents" or "mom or dad". In 2016, the wording was changed to "parents or caregivers".

Note. The number of students and/or school districts included from year to year could vary due to schools participating in some administrations and not others. As a result, these trend findings should be approached with some caution.
